

2017 CHICKEN, EXOTIC FOWL AND GAME BIRD P-T TEST

Chickens, exotic fowl, and game birds must test **negative** for Salmonella pullorum-typhoid (P-T) within 90 days of arriving at fair. A certificate stating that the birds have been tested negative for P-T will be required upon arrival at fair and before birds will be allowed into the exhibit barns. The Fair will be holding P-T Testing during vet check day (see below).

Exception to providing a negative P-T certificate:

For birds hatched in 2017, exhibitors that meet one of the two options below do not need to have their birds P-T tested prior to exhibit:

1. The exhibitor is a participant in the 2017 National Poultry Improvement Plan (NPIP); or
2. The show birds were bought from;
 - a. 2016 NPIP participants;
 - b. Hatcheries; or
 - c. Feed stores

The exhibitor will be required to provide proof of number 1 or 2 above.

You may attend the **Fair P-T testing** on **Wednesday before fair** at **11am-12 noon** or arrange the testing through your personal veterinarian. The Fair P-T testing will be done by a Washington State Veterinarian and will have immediate results.

Check one:

- I am a National Poultry Improvement Plan (NPIP) participant.** Attached is proof of participation.
- I purchased my birds from a hatchery, NPIP Participant, or feed store in the last 12 months.** Attached is bill of sale receipt.
- I will need to have my birds tested at the Fair P-T Testing.**

I _____ understand the Washington Pullorum-Typhoid testing requirements:
